SCAL-400

Automatically charges, bump tests and calibrates up to five SENSIT® P400 Gas Monitors simultaneously.

SCAL-400 Calibration and Charging Station features a touch screen display. Use your finger or the included stylus, to access instrument and station information.

Simply place an instrument onto any of the five slots. Each slot contains charger and communication connections. Testing functions require no user interaction.

During connection, the station automatically detects when an instrument requires a bump or calibration, and then performs the required test.

SCAL-400 Calibration and Charging Stations come with **SCAL-D** Data Management Software. **SCAL-N** is the Network version of the software. **SCAL-N** is sold separately with a multi-year license. Use **SCAL-N** to download data from remotely located Calibration Station(s). Data is stored in SQL Server.
