GAS TRAC® LZ30 + SMART LINK LIVE

METHANE GAS DETECTOR

Try SMART LINK LIVE **FREE** for 30-Days! GET IT ON Google Play

SMART LINK LIVE application meets the growing demand for tracking and traceability. It allows the user to keep their eyes on the target while data streaming from the LZ-30 is captured within the application. The application logs date, time, GPS coordinates and measurements. Sessions can be exported from the phone/tablet in multiple formats. With built-in picture/video capture, the user can associate any reading with a picture or even report a corrosion issue.

- ✓ GPS- tablet/smartphone provides the GPS data
- ✓ Datalog- receives & records a reading every 1/10sec ,stores date/time, ppm•m (default) measurements & GPS coordinates.
- ✓ Sessions- are supported to break out surveys.
- ✓ Picture/Video- the application support pictures and video
- ✓ Survey Logs- these are automatically stored to the tablet/smartphone.
- ✓ Files- support the creation & sharing of .csv, .pdf and .kml files
