# GLT GASLESS LEAK TRAINER

The new standard for gas detection and emergency response training

The **Gasless Leak Trainer** was designed to meet the hands-on training needs for gas emergencies and hazardous leak investigations. The **GLT** system pairs a Bluetooth-enabled tablet with a specially equipped **TRAK-IT IIIa** to simulate real-world scenarios without the need for live gas. The system includes Training Mode, Monitor Mode, and Testing Mode to assist with every aspect of employee development related to hazardous gas investigations.

The **GLT** allows for total control of the training process. In *Training* mode, the trainer remotely sends commands to the user's instrument in real time, allowing the employee to experience realistic scenarios in a gas-free environment. In *Monitor* mode, the trainer can observe the actions taken by the employee on the instrument during an exercise or live event. In either mode, the trainer observes the employee's response to gas values, alarms, and other actions. The tablet also incorporates a customizable *test* to assess employee proficiency.

## Gasless Leak Trainer key features:

- Simulates hazardous conditions without live gas
- Improves employee safety and competency
- Provides realistic sensor and instrument response
- Includes customizable employee testing
- Improves emergency response and public safety

## Training Applications include:

- Emergency Response
- Confined Space Monitoring
- Leak Detection and Investigation
- Gas Purging
